For Client name:	Edwin Kona
SA Online: WD & Q Ref:	WD 2002204
Running Months:	May - June

*** If there a certificate for a prior year please ensure it is saved on route of domain.

Search Engine Optimization, otherwise referred to as SEO is the implementation of certain principles, tasks and tools done on a website to influence search engines to better understand the purpose of a website and web pages, giving the pages a better chance of top positions on relevant searchers.

SEO can broadly be divided into tasks and steps that can either be done once off, or repeated.

Each search phrase (statements made) or long tail search phrase (question asked), each webpage, each website, all need their own strategy. There are millions of pages competing for positions on search engines and search engines reassess webpages frequently.

Before any work can be done, research into the competitiveness of the related industry has to be done in order to determine competing websites, and develop a strategy to outrank their webpages for better positions.

The process of our SEO is three phases:

1. Research the market & design a custom strategy with a priority list of search phrases and long tail search phrases, tools and tasks to be done in first few sessions. **(Session 1)**
2. Implement priority list of tools and tasks in the first few sessions. **(Session 2-6)**
3. Maintain site with tasks that need to be repeated. Frequency and updated / relevant content are imperative tasks to increase and maintain positions on search results. **(Session 7-12)**

Once a year has been completed, the entire process should be done again to do a new competitor check.

This document is an independent certificate developed by www.JeanPierreMurrayKline.co.za and is a guideline of the most up to date and generally accepted tricks and tools of the trade to increase website rankings on Search Engines.

Primary Search Phrases & Long Tail Search Phrases.

1. Primary – always loaded on all pages. Service based.	Example	Position on Google session 1 and date checked.	Screenshot:	S3	S4	S9	S12

Check Google result.

Competitor site

SEMrush – add competitor site to find out what words they are ranking for.

General.

- How many areas of products or services?
Check website.
- How many primary products and services?
Check website.
- Does the competitor have multiple sites / banners sites?

Site General.

- Is the website mobile friendly?
Use <https://www.google.com/webmasters/tools/mobile-friendly/>
- Is the website responsive?
Drag browser window smaller/bigger.
- Is there a page per product or service?
Check website.
- How many pages are there?
Use <http://www.siteliner.com/> or Screaming Frog SEO Spider.
- How many words are there?
Use Screaming Frog SEO Spider.
- How many images are there?
Use Screaming Frog SEO Spider.
- How many menu items are there in the 1st tier?
Check website.
- How many menu items are there in the 2nd tier? Are there more tiers?
Check website.
- How many videos are there?
Check website.
- How many incoming links are there?
Use <http://www.siteliner.com/>
- How many outgoing links are there?
Use <http://www.siteliner.com/>
- Social media status – What social media is linked?
Check website.
- Social media activity? [Once a week, once a month, once every 4 months?]

Check social media accounts.

- **Is the site owner dealing with negative reviews online?**

Check social media accounts.

- **What is the current monthly unique visitor's average?**

Use <https://www.alexa.com/siteinfo>

Search engine advance.

- **Are there any Browser Push Notifications?**

Put site URL in address bar of browser and check for notifications.

- **Has the site been optimized for search snippet – SERPs?**

Check Google result.

Setup Log (S2-6)

This is the phase of steps and tasks that can broadly only be done once.

Task / Description / Detail	Completed Date	Developer
<p>2nd session priority set up & foundation. Migrate site to domain with use of primary search phrase if client agrees and accepts cost. If the competitor has multiple sites / banner sites, the client must decide to do the same, or focus on limited search phrases (select products only or a category) for website. Relocate site hosting based on requirements of clients - local sever to client target. Update all page names, titles, descriptions in line with primary search phrase and long tail search phrases, must be in line with Google guidelines and recommendations. Update all images and videos to include primary search phrase and long tail search phrases. File names and tags. Setup of Search Console (Webmaster Tools). Setup Google Analytics. Google sitemap (XML sitemap) added and linked to Search Console (Webmaster Tools). Add Robots.txt file. Add Favicon to website. If CMS system - integrate the required plugin - example Wordpress - SEO Yoast. Correct broken links. Ensure any redirects are in order (301 and 302). Link social media. Correct broken forms and incorrect contact information. Submission of website to main Search Engines. (Yahoo Bing Google). Client to keep to a social media posting schedule if linked to site. <i>For them to manage or outsource.</i></p>		
<p>3rd session priority set up & foundation. Correct / action any urgent recommendations needed after the competitor review, more pages (add page per product/service if that is what the competitor does), more text, and more images. <i>Client must accept quote for extra development time if needed to add these extra pages.</i> Resubmit sitemap to Google if new pages were added. Keywords in headings (<H1>, <H2>, tags) Correct any plagiarism concerns, get text updated. <i>Client must sort out own copywriter and development time to get this fixed.</i> Correct responsive issues. <i>Client must accept quote for extra development time to fix this if needed.</i> Correct download media speed if required by removing large images / media. Correct / remove poor / duplicate / hidden text. Do a position check on Google and add to log.</p>		

4th and 5th session priority set up & foundation.

Add more videos. *Client must arrange with supplier to get videos made.*
Correct / add incoming links (more can be added in RCR&M, but must have more than competitor)
Correct / reduce outgoing links.
Improve on structure and flow. Design and development element. Usability helps with dwell time.
Add search engine GEO location information if required.
Create internal site directory, back end of site, hidden page from main site menu, with 1 internal link to landing page off contact page.
Set up Google Business Profile if beneficial.
Google Maps listing added for the business if core business is location specific. (One city)
Custom Google Search Engine added to inner pages - add to bottom of contact page only.
Improve on hierarchy for site navigation. (1-3 tiers only) - moving main files to index page.
Update site security if needed. *Client to be quoted on this separately.*
Correct keyword density based on RPD. *Client might need to get copywriter.*
Keyword stemming: Applicable to non-English language pages. Check and action if required.
Remove cloaking.
Remove iframes where possible.
Check if there are issues with complex code such as Java, etc. This will need to be quoted for and outsourced in order for step to be taken and only applies on advance sites.
Run a 3rd party SEO checker. (Screaming Frog SEO Spider)
Continue with 'Correct / action any urgent recommendations needed after the competitor review, more pages (add page per product/service if that is what the competitor does), more text, and more images.'
Resubmit sitemap to Google if new pages were added.

6th session priority set up & foundation.

Implement recommendations from 3rd party SEO checker. (Screaming Frog SEO Spider)
Add an internal site search feature.
Continue with 'Correct / action any urgent recommendations needed after the competitor review, more pages (add page per product/service if that is what the competitor does), more text, and more images.'
Resubmit sitemap to Google if new pages were added.
Resubmit site to search engines.
Do a position check on google and add to log.

Implement options for Google Actions search and voice commands on site, if available and applicable. *This might require extra developer time to be quoted on, to be actioned from session 7 onwards.* <https://developers.google.com/assistant>

RCR&M Log (S7-12)

Repeated checks, Reviews, Tasks and Maintenance

Task / Description / Detail	Completed Date	Developer
<p>Sessions 7-12 need to focus on correcting / action any recommendations needed after the competitor review, more pages (add page per product/service if that is what the competitor does), more text, and more images.</p> <p>In addition, the following tasks need to be completed at least an addition two times:</p> <ul style="list-style-type: none"> Import of every page, and tweaking of Page Title, Description and Meta. Checking contact form and information. Checking position on Google and adding to log. Making sure client is keeping to a social media posting schedule if linked to site. Check for broken links and correct. Check 3rd party SEO site recommendations and adjust if needed.
